

DNREC – Division of Air Quality

PUBLIC WORKSHOP NOTICE

The Department of Natural Resources and Environmental Control (DNREC), Division of Air Quality (DAQ) will conduct a public workshop on the planned amendment of 7 DE Admin Code 1144, “Control of Stationary Generator Emissions,” which is also known as Regulation No. 1144.

DAQ is planning to amend 7 DE Admin Code 1144 to update the language of the regulation and to make minor corrections to the emissions requirements based upon recent promulgations for similar engines made by the US Environmental Protection Agency (EPA). Additionally, the regulation will be amended to lower the diesel sulfur content requirement from 500ppm to 15ppm, to be consistent with EPA requirements. Other planned amendments include clarifying the sulfur content provisions for natural gas and propane, and clarifying various definitions and regulatory requirements.

The purpose of this public workshop is to educate the public and affected industry on the draft amendments to the stationary generator regulation, and to hear comments and recommendations to aid in the development of the formal proposed amendments to the regulation. The amendments to this regulation may impact any owner or operator of a stationary generator. As such, any person which owns or operates a stationary generator in Delaware should consider attending this workshop to learn about the planned amendments.

The draft regulation is currently available on DAQ’s regulatory web site at <http://www.awm.delaware.gov/Info/Regs/Pages/AQMReg1144.aspx> and will also be provided at the workshop.

WORKSHOP INFORMATION

Date: Wednesday, July 6, 2011

Time: Starting at 6:00 pm

Place: Delaware Energy Office – Conference Room

Address: 1203 College Park Drive, Suite 101

City: Dover, DE 19904

For additional information on this workshop, please contact Mark A. Prettyman at 302-739-9402.
